CushyStock Microstock Upload Software

[CushyStock Microstock Upload Software](#) **[1]**

Cushystock is no longer supported - this post is for reference only

[Cushystock](#) [2] is a [microstock](#) [3] keywording and upload assistant that streamlines the work of submitting images to multiple microstock agencies. Like [prostockmaster](#) [4] it supports multiple agencies (10 at present), there is a free trial but the full version of the software costs US$ 49.95.

Unlike most of the other 'multi-upload microstock' assistants cushystock also supports [raw formats](#) [5]. Due to the fact that I'm currently happy with my current upload system, I have not performed a full review of cushy, but the users of microstockgroup have [voiced their opinions](#) [6] and with services like this moving into the 'cloud' I feel the days are numbered for downloaded tools like this unless you use them for a significant part of your keywording workflow.

[Download a free trial of cushystock](#) [7]

[Visit the cushystock website](#) [2]
